SKILLS

- ❖ **Programming Languages:** Javascript, Typescript, C++, Python
- ❖ **Web Technologies & Frameworks:** HTML, CSS, Tailwind CSS, React.js, Node.js, Express.js, Next.js (Basics)
- ❖ **Databases:** MongoDB
- ❖ **Tools:** Git, GitHub, Postman, MongoDB Atlas, VS Code
- ❖ **Soft Skills:** Collaboration, Multi-Tasking, Positive attitude

EDUCATION

- ❖ Information Technology | Lovely Professional University *CGPA: 7.97 | (JUN'24)*
- ❖ Diploma in CSE | Lovely Professional University *CGPA: 7.98 | (JUN'21)*

EXPERIENCE

- ❖ **Chatbot Developer | Leena AI** *(AUG'23-Present)*
 - Developed and optimized JavaScript workflows to filter, clean, and transform API responses, ensuring efficient data processing and integration with front-end applications.
 - Collaborated with the backend team for API integrations, leveraging JavaScript to enhance real-time data flow and support smooth, scalable applications.
 - Utilized **POSTMAN** for **API testing** and integration, streamlining onboarding and offboarding experiences by creating customized forms and integrating seamlessly with chatbot applications.
 - Developed multiple Proof of Concepts (POCs) for prominent clients, demonstrating the feasibility and effectiveness of proposed solutions

ACADEMIC PROJECTS

- ❖ **Full Stack Cart Application (MERN) | Tech:** MongoDB, Express.js, React.js, Node.js
 - Developed a full-featured cart application with user authentication and authorization using JSON Web Tokens (JWT).
 - Designed and implemented a client-server architecture, building RESTful APIs for user registration, login, and profile management.
 - Integrated MongoDB for storing user and product data, implementing CRUD operations, and secure data handling.
 - Implemented OTP-based user verification and password recovery using NodeMailer.
 - Utilized TypeScript on both the client and server sides for type safety and efficient error handling.
 - Created dynamic product listings and handled cart functionality, allowing users to add, update, and remove products from their carts.
 - Tested APIs using Postman to ensure functionality and reliability, with thorough error handling and validation mechanisms.

- ❖ **Notes - Maker Application (MVC) | Tech:** MongoDB, Node.js, Express.js, EJS, Tailwind
 - Developed a full-stack task management web application using MongoDB, Node.js, Express, and EJS. The application allows users to create, edit, and delete tasks stored in a MongoDB database with real-time interaction.
- ❖ **Grammarly Live - Realtime Chat with AI | Tech:** React.js, Gemini API, Javascript
 - Developed a responsive user interface using React.js and Tailwind CSS.
 - Users can ask queries in the form, of prompts, and the bot will respond on time.

POSITION OF RESPONSIBILITY

- ❖ **Web Developer | GeeksforGeeks-LPU, LPU** *(May'21-JUL'23)*
Re-designed, developed, and deployed the official website for the GeeksforGeeks - LPU college community.

ACHIEVEMENTS / HOBBIES

- Received the appreciation certificate from Sandeep Jain (Founder of GeeksforGeeks) for my contribution to the community.

LANGUAGES

- English (Proficient)
- Hindi (Native Language)
